

DHI-ARA42-W

Wireless Repeater

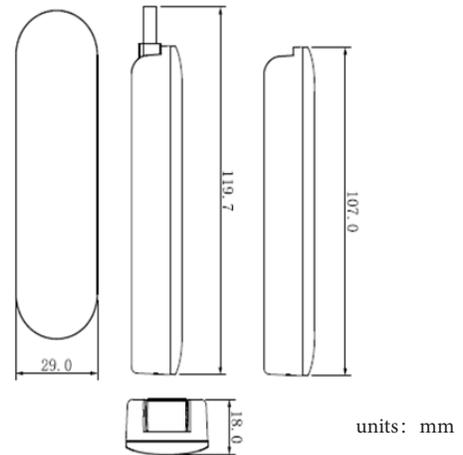

Features

- DC5V USB power supply
- Adjustable USB power interface, 0°, 90°, 135°, 180°, better signal strength
- High performance RF module, with strong communication stability
- 150m transmission distance in the open air
- Help extend the distance between detectors and hub/panel

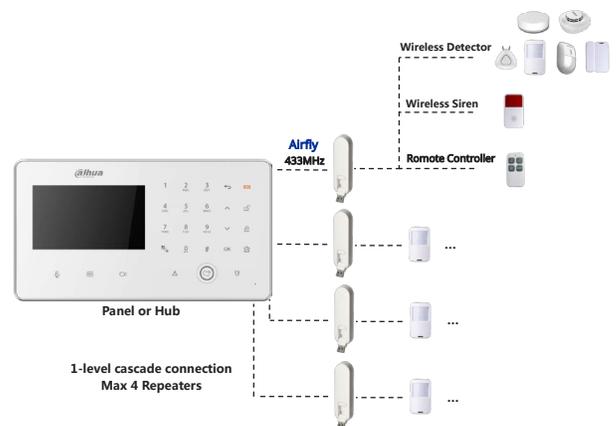

Dimensions

Technical Specification	
Name	Wireless Repeater
Power Supply	USB DC5V/0.5A
Carrier Frequency	433MHz
Transmitting Power	10dBm
Transmission Distance	150 meters(in the open area)
Repeater Cascade	1-level cascade connections
Work Temperature and Humidity	-10 C~55 C, <95%
Dimensions	107×29×18mm (L×W×T)
Weight	<0.1kg
Certification	CE, FCC

Application

Successfully pair repeater to the panel/hub just like detectors, move repeater to the position between panel/hub and detectors or accessories, then they will search and connect with the repeater automatically
